

Harvest with the industry leader.

Savage Harvesters

Savage's small family of harvesters have been perfected through several generations over the past four decades. Tested in Savage's own pecan orchard and many orchards around the world, they now lead the industry in pecan harvesting. The larger 8261 Harvester is used in large and mid-size pecan orchards across the U.S. and

several other countries. Its little brother, the 8042 has been helping smaller nut-growers harvest for decades.

Savage harvesters have also proven to be effective harvesting other nut varieties. See our Savage harvesters in action on our website, and YouTube channel: youtube.com/savageequipmentinc.

Savage Harvesters

With the Model 8261, you can dump a load of nuts in just a few seconds, without even leaving the tractor seat.

Whether you tend a few dozen trees or a few hundred acres, a new Savage Harvester will bring tremendous efficiency to harvest season. Whether it's a grove of randomly sized native trees or a pristine orchard, nothing matches the speed, flexibility and value of Savage Harvesters.

Model 8042
Harvesters feature a 14 HP Kohler electric-start, gas engine and a lift-auger bagging system. It can be towed behind an ATV or lawn tractor.

Trust a Savage Harvester to do the hard work at harvest time!

Savage Harvester Features:

- Simple and quick tractor mounting
- Highly maneuverable in all types of orchards and groves
- Side dump in trailers as high as 8 ½ feet
- Stout rubber fingers pick up nuts in grass, leaves, or on bare ground
- High-speed fan eliminates most trash
- Standard 1.625" sizing chain, but other sizes are available
- Model 8042 can be towed by an ATV or lawn tractor.
