

Savage Limb Rake

Savage rakes keep the orchard floor clean season after season.

Savage's folding rakes make storage and transportation much easier.

Well managed, clean orchards are better at fending off insects and other pests and make your other orchard tasks that much easier. A Savage rake may be just what is needed to help you get there. The standard 7218 rake is 18' wide with the two "wings" unfolded. The rake is also available without the wings, and is 10' wide in that configuration. Our rakes allow you to adjust tine height and the angle of pitch with controls at the tractor seat.

Savage Rake Features:

- Simple and quick tractor mounting
- Tractor-seat controls for tine height and pitch
- Replacement of tines is simple and fast.
- Easy-folding hinge for convenient transport and storage (on 18' rake)
- Heavy duty tubular steel frame for many seasons of rugged use

All Savage rakes feature hydraulically controlled tines enabling the operator to adjust for the terrain and type of debris. Tines are very simple to replace and can be replaced individually as needed.

Model Number	Rake Width	Folded Width	Height Extended/Folded	Length
7210	10'	N/A	37"	156"
7218	18'	10'	37"/45"	156"
