The remarkable story of Savage Equipment begins with the Savage Shaker. It was the first piece of machinery developed here, and it was the first of its kind for the nut-harvesting industry. Through six decades of upgrading our shakers, we have perfected them into these finely crafted, rugged machines. They are helping growers get the job done in many parts of the globe.

The Savage family of shakers includes five models—a size to accommodate virtually every tractor size and tree-trunk diameter. They are built to take the punishment of shaking and be gentle on your trees. You can see them in action on our website, www.savageequipment.com or our YouTube channel, www.youtube.com/savageequipmentinc.

Savage Shakers

Clamped and ready to shake with our smallest model, the 2138

Just a few seconds of shaking brings a shower of leaves and nuts.

No other piece of orchard equipment takes the kind of punishment a tree shaker does. That's why it's important to go with a proven industry leader. By testing our equipment season after season in our own pecan orchard, we're able to perfect Savage designs year-by-year, and produce equipment that provides real value and is built to last.

Model Number	Min. Tree Diameter	Max Tree Diameter	Shake Pwr. Index	Weight	PTO/HP Required
2138	0"	30"	2.0	1320	540/45HP
2542	*12"	*42"	4.8	2050	540/70HP
2548	*4"	*48"	5.0	2210	1000/90HP
2653	*10"	*53"	6.5	2490	1000/100HP
2158	10"	58"	7.5	2850	1000/115HP

* Subtract 8" when optional donut pads are installed on shaker. Donut pads are standard on 2138 and 2158 models.
