

Sweep through harvest faster!

Savage Side-Sweeper & Blower

Model 7510

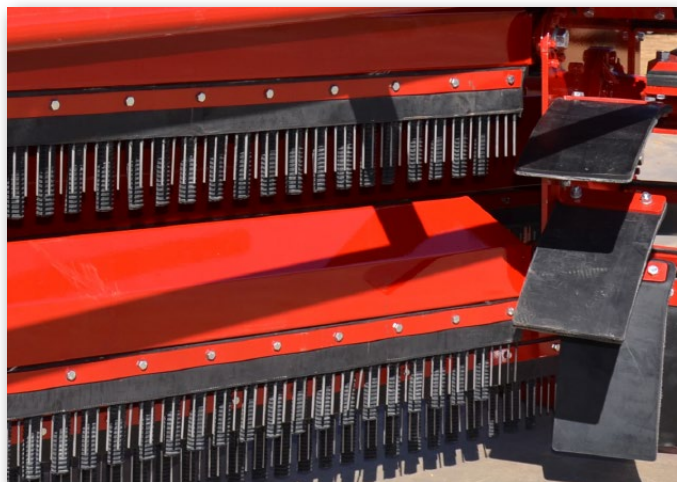

Savage's side-sweeper will increase the speed and efficiency of your nut harvest season after season. This powerful machine sweeps a generous 10-foot swath, moving nuts and debris into neat, straight rows. The sweeper, combined with Savage's powerful 5132 rear-mounted blower, will bring even greater labor savings to harvest

season. This combination also means less time and less wear-and-tear on your harvesters, since they will need to cover far less real estate. You can check out this dynamic duo in action on our Savage website, or our Youtube channel, www.youtube.com/savageequipmentinc.

Savage Side-Sweeper and Blower

The Savage Side-Sweeper and Blower will help you harvest nuts faster!

The 7510 Sweeper will improve your bottom line, helping to get more nuts to market quicker. It is hydraulically operated, and hoses are simple to connect. The rotating bars consist of heavy-duty steel tines and individual rubber fingers that power through grass and reach down deep to move the nuts. Rotation speed is completely adjustable.

The fan of Savage's 3-point blower is finely balanced for speed and efficiency. The powerful air stream moves nuts, leaves and sticks from under the trees allowing your sweeper and harvester to be more effective.

Savage Sweeper Features:

- Convenient T-bar storage stand
- Simple and quick tractor mounting
- Heavy-duty double ball bearings minimize down time and repairs.
- Free-floating sweeper head performs well in uneven terrain
- Heavy steel tines and rubber fingers
- Durable, reinforced rails and disks
- Precision milled and over-engineered throughout to last many harvest seasons
